Hiring Manager

OpenTable

India

Dear Hiring Manager,

I am thrilled to apply for the **Frontend Engineer II** position at OpenTable. With 3 years of experience in developing scalable, user-centric web applications using technologies like React, Redux, Node.js, and TypeScript, I am eager to bring my expertise and passion for clean, efficient code to your team.

In my current role at **Axeno**, I have:

- Developed and maintained **high-performing web applications** leveraging React, Redux, and Node.js to deliver seamless user experiences.
- Championed **clean code principles** and test-driven development to enhance application reliability and scalability.
- Collaborated in **agile teams**, employing pair programming and conducting rigorous code reviews to ensure quality.
- Optimized web performance and integrated **CI/CD pipelines** for rapid and reliable deployments.

Your commitment to delivering creative, high-quality products while fostering a culture of continuous improvement deeply resonates with me. I am particularly excited about the opportunity to contribute to the development of integrations connecting OpenTable Restaurants with their Point of Sale systems—bridging technical challenges with meaningful real-world impact.

Beyond my technical expertise, I pride myself on being a proactive problem solver and an enthusiastic collaborator. I thrive in fast-paced environments where ownership and innovation are encouraged, and I am eager to bring this mindset to OpenTable.

I have attached my resume for your review and would welcome the opportunity to discuss how my skills and experience align with OpenTable's mission. Thank you for considering my application, and I look forward to the possibility of contributing to your team.

Sincerely

Deepak Sharma
