EDUCATION

Master of Computer Applications

B.P.I.B.S. College, IP University

2019 - 2022

Bsc Hons Computer Science

Delhi University

2016 - 2019

SKILLS

Frontend

Javascript , React , Typescript , Nextjs , Angular , SASS , Tailwind , MUI , HTML5 , CSS3 , Shadcn UI , Redux , React DND , Reactflow

Backend & DB

GO , Nodejs , Nestjs , Firebase , SQL , postgresql , MongoDB , Prisma

Other

Git , Jira , Docker , Redis , Jest , AEM

STRENGTHS

Problem-solving skills

Solved complex coding problems using React resulting in faster application performance.

Team player

Collaborated with cross-functional and external teams to develop and deliver high-quality products.

Attention to detail

Implemented stringent testing and review protocols, coupled with knowledge of the best coding practices and documentation, to guarantee code precision and quality.

ACHIEVEMENTS

Leading a cross-functional team

Successfully led a team of developers to deliver a complex web application.

Intern Mentorship

Mentored an intern in web development, providing comprehensive training on frontend (HTML , CSS , JavaScript and React)

Deepak Sharma

Proficient Full Stack Developer with 2.5 years of experience in latest technologies. Dedicated to delivering high-quality solutions and excelling in collaborative, dynamic environments.

EXPERIENCE

Software Engineer L2

Axeno Consulting Private Limited , Greater Noida, India

April 2022 - Present

As a Software Engineer at Axeno, I specialize in frontend development, concentrating on building scalable user interfaces Nextjs. Moreover, I contribute to backend infrastructure using Node.js, improving both security and performance.

- Crafted a Form Builder with React, Redux, Material-UI, and REST API integration, enhancing form customization efficiency by 40%.
- Designed and implemented database schemas, including table creation, column definition, and indexing, to enhance backend application performance in SQL.
- Developed a 90% optimized nested drag-n-drop feature in React. Integrated many open-source libraries into different projects. Implemented caching and throttling for APIs which increases the speed by 20%.
- Developed a website utilizing the modern React framework, Next.js, achieving impressive performance with a 93% score in the Lighthouse report.
- Implemented full SEO optimization, achieving a perfect score of 100%, thereby enhancing visibility and reach.

Frontend Developer Intern

Three Arrow Technologies, Vadodara, Gujarat, India

May 2021 - October 2021

As an Angular dev, I developed complex reusable interactive components. Actively contributed to successfully implementing numerous features and resolving bugs within the project. Demonstrated proficiency in Angular and problem-solving, enhancing the overall functionality and user experience of the applications.

- Designed an analytical dashboard for the application, offering comprehensive insights into user behavior and app performance.
- Created OTP based service with Redis. Integrate PostgreSQL database with ORM Prisma.
- Ensure cross-browser compatibility and consistent user interface.
- Resolved over 100 bugs in both development and production environments through effective debugging and troubleshooting, while collaborating with other product teams on integrations, testing, and deployments.
- Integrated Payment gateway for the users for different models.

PROJECTS

Devlog - [github](#) , [live](#)

App about journey of exploring, experiments, and problem-solving with the development logs. It uses the HTMX approach SPA for server side rendering, with custom components, code blocks. It uses GO for backend to return the dynamic HTML views, integrated with oauth (Google login/signin).

Tech used : HTMX, GO, Tailwind, Templ, PostgreSQL.

Alter API - [github](#) , [live](#)

The Application is based on API development . Platform where they can build, test, document and collaborate with the team. Automate manual tests and communicate the expected behavior of an API by simulating endpoints. Users can test API. Invite the team members having the collaborative session. Power to create documentation out of their saved endpoints, responses.

Tech used : Angular, Typescript, Nodejs, Firebase, Mongoddb.

Personal Portfolio (with Blog App) - [github](#) , [live](#)

Crafted a sleek and minimalist portfolio website with Reactjs & Next.js, Framer Motion, and Shadcn UI, showcasing creativity and technical skills. App about journey of exploring, experiments, and problem-solving with the development logs. It uses MDX approach to render each blog, with custom components, code blocks.
