Hyderabad, Telangana, India (Remote)

Dear Hiring Manager,

I am writing to express my interest in the Senior Software Developer position at [Company Name]. With 2.5 years of full-stack development experience, a robust understanding of React, Next.js, Node.js, TypeScript, SQL, and Go, and a passion for building efficient, user-centric applications, I am excited about the opportunity to bring my skills to your team.

In my current role as a Software Engineer L2 at Axeno Consulting, I have developed scalable front-end interfaces and optimized backend performance across various projects. For example, I recently built a Form Builder application using React, Redux, Material-UI, and REST APIs, which improved form customization efficiency by 40%. This project required close collaboration with cross-functional teams, a strong understanding of design principles, and an attention to detail that enabled me to deliver high-quality solutions under tight deadlines.

My technical expertise extends beyond the frontend. I have worked on backend development with Node.js, PostgreSQL, and SQL, enhancing application performance through optimized database schema design and caching mechanisms. Additionally, my experience with Go and cloud platforms such as Railway has strengthened my understanding of backend infrastructure and API design, contributing to my proficiency as a well-rounded full-stack developer.

I am highly adaptable and eager to stay current with industry advancements. For instance, my personal portfolio, hosted live on Vercel and Railway, showcases modern design practices and a seamless user experience, leveraging technologies like Framer Motion and Shadcn UI for smooth interactions. This project demonstrates my dedication to continuous learning and my ability to independently build, deploy, and maintain full-stack applications.

I am excited about the possibility of bringing my skills in software development, problem-solving, and collaboration to [Company Name]. Thank you for considering my application. I look forward to discussing how my background and your goals can align for mutual success.

Warm regards,
Deepak Sharma
